SELECT RESEARCH PROJECTS

Reflected Reality: Augmented Reality through the Mirror

Under Review

Designed and engineered *Reflected Reality*: an augmented reality prototype interface that expands the augmented space across a smart mirror, to enable novel interactions blending the physical space and its reflection.

Here and Now: Creating Improvisational Dance Movements with a Mixed Reality Mirror

CHI 2023

Motivated by the prevalence of mirrors in dance studios and inspired by Forsythe's Improvisation Technologies, we conducted workshops with 13 dancers and choreographers to highlight how the MR mirror enriches dancers' temporal and spatial perception, creates multi-layered presence, and affords appropriation by dancers.

Movement Guidance using a Mixed Reality Mirror

DIS 2022

Built and evaluated a movement training system featuring a mixed reality mirror and a humanoid virtual instructor avatar.
